

Master the Global UDI Compliance Challenge

Life sciences companies face the challenge of managing their medical devices with **increasing UDI regulations** to maintain global competitiveness.

Understanding UDI Compliance as a Permanent Task

Current UDI Guidelines are Just the Tip of the Iceberg

Changing the Perspective on the UDI Challenge

Regulatory guidelines are nothing new for life sciences companies. As more and more regulations are added by authorities, companies need to **examine their approach** to balancing compliance and moving the company forward to **ensure competitiveness**.

Understand UDI as a Permanent and Long-Term Program

We are only at the start of **regulations on UDI compliance**. Every medical device manufacturer will need to **manage product data** for target markets all over the world with different requirements on UDI.

Position Yourself Strategically

No matter the company size, it is essential to **prepare for the future of UDI compliance**. Medical device manufacturers can get ahead by evaluating internal processes and **define a company-wide strategy** for current and upcoming UDI requirements.

Life sciences companies need to set up a **global company-wide strategy**, using process automation and benefit from expert guidance to **achieve UDI compliance** for medical devices in the long-term.

p36 and SAP

Life sciences companies can leverage the **UDI Platform by p36** to establish a central system for managing all UDI-related maintenance and submission processes.

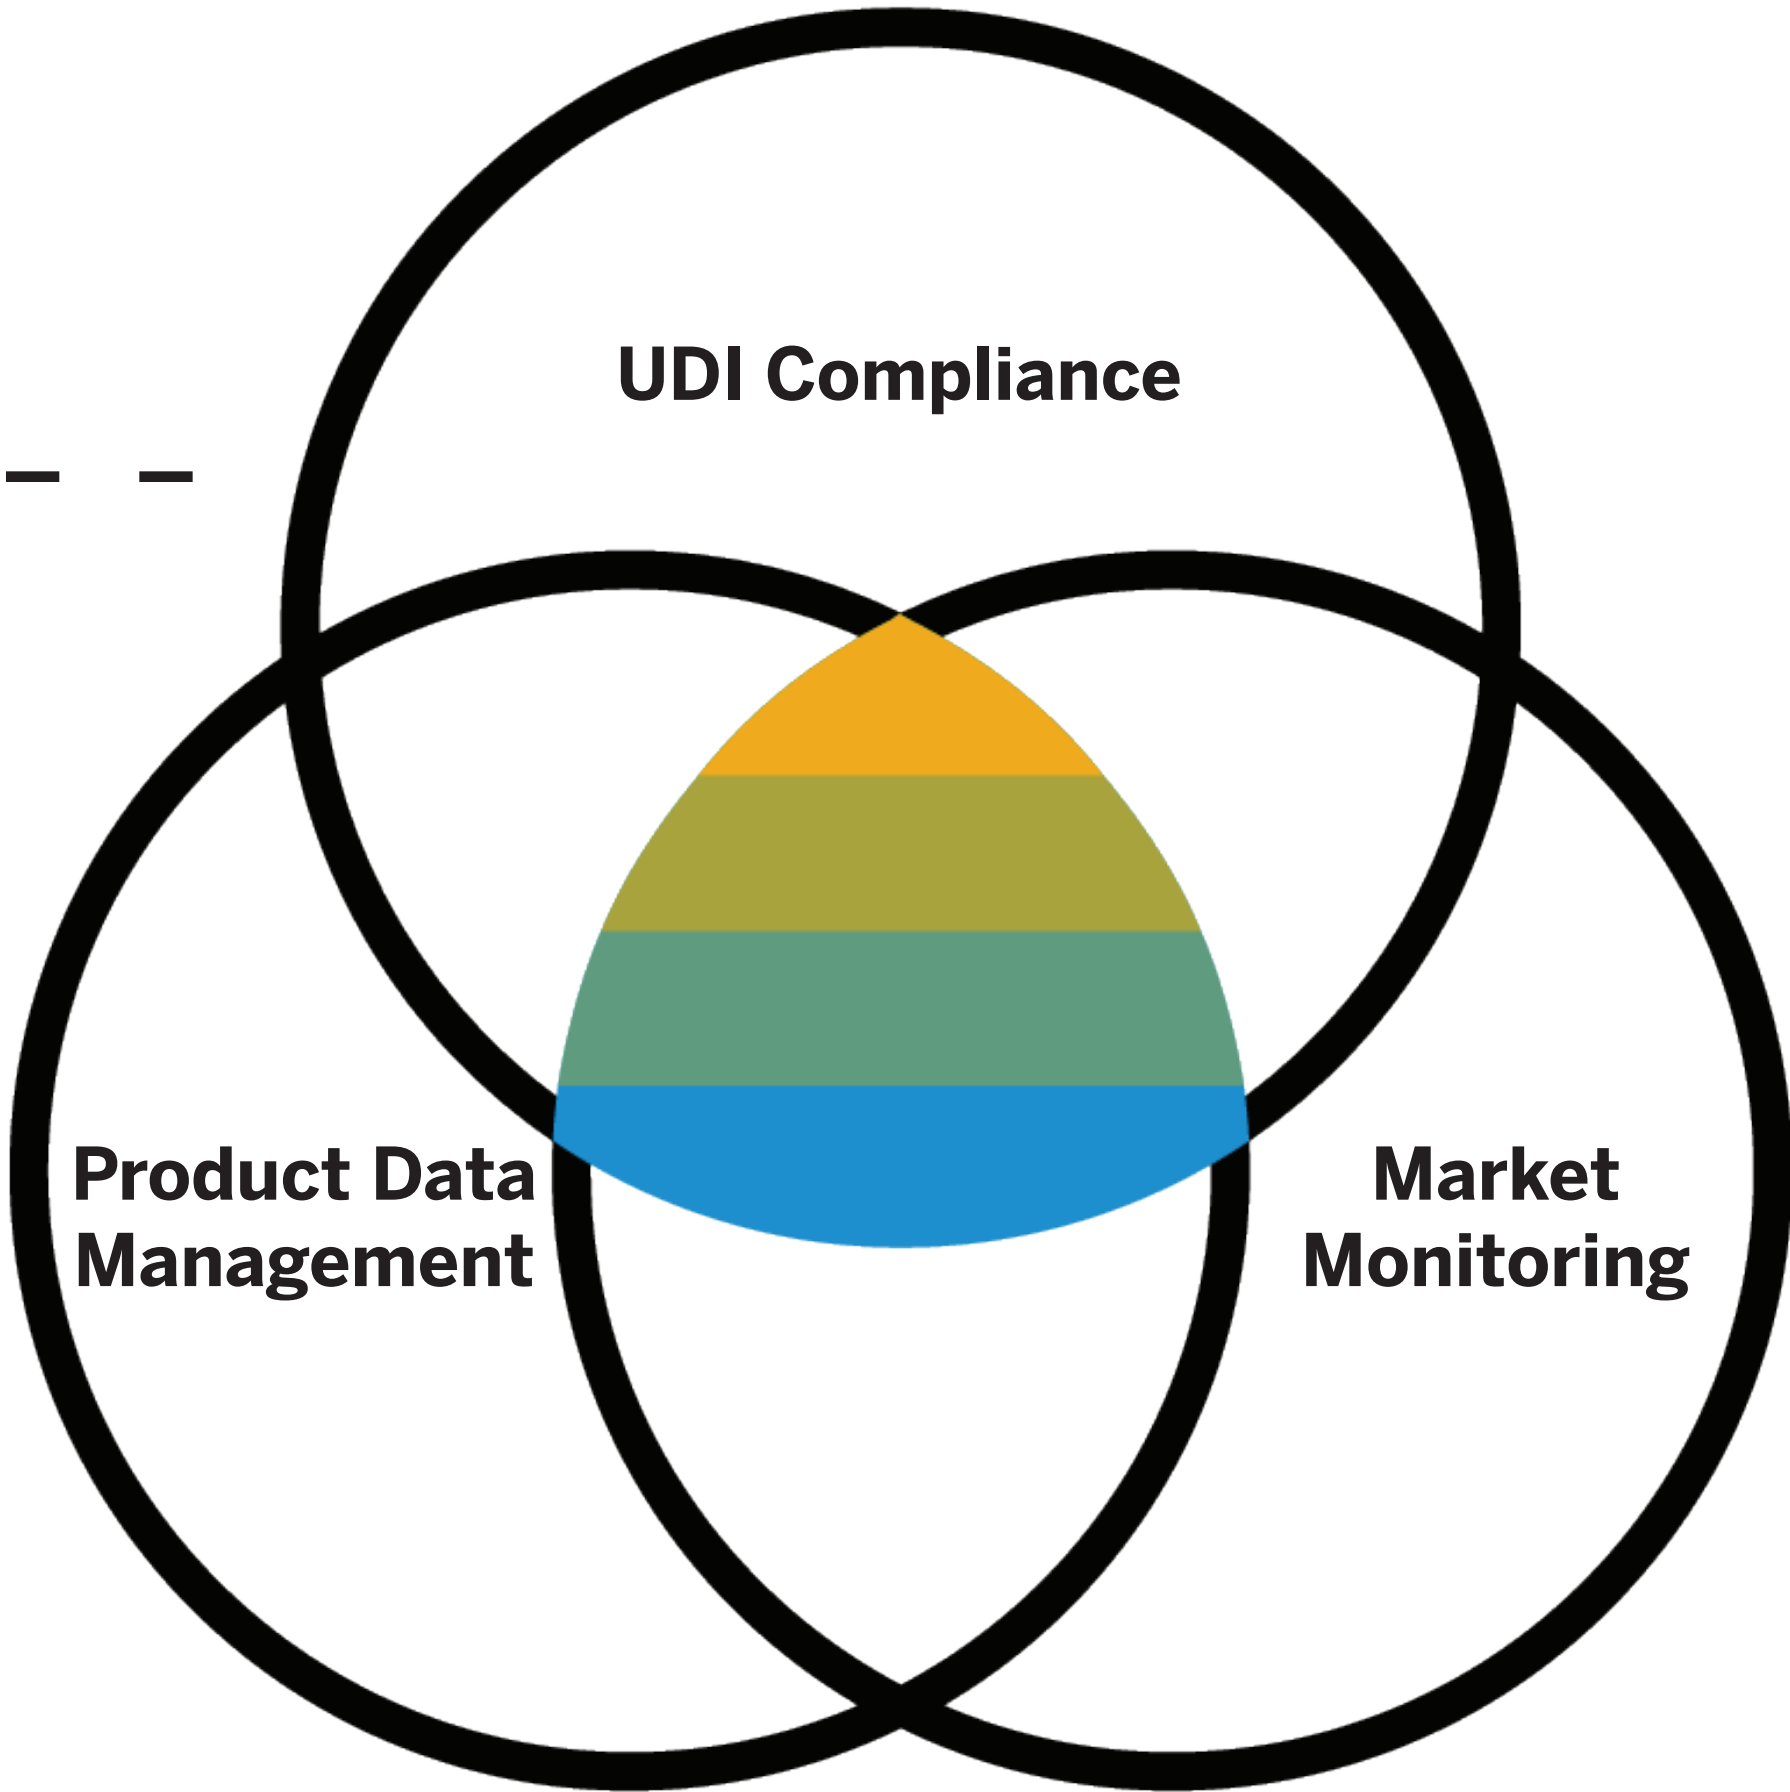

Life Sciences Industry Challenges:

More and more regulatory authorities worldwide are **demanding UDI compliance** within current and upcoming markets

Every authority has **different requirements** and compliance deadlines

Establishing a company-wide and global strategy to **centrally manage UDI data and beyond**

SAP and p36 Harmonize Life Sciences Business Processes:

- Strong collaboration** of SAP Business Technology Platform and p36 UDI Platform to **digitally transform** UDI regulation compliance worldwide
- p36 **UDI compliance expertise** for regulatory and IT transformation
- One centralized governance process** with reuse of UDI data for different target markets worldwide

About p36' UDI Platform

The UDI Platform is an **SaaS solution and part of SAP's industry cloud solution portfolio** - based on the SAP Business Technology Platform (BTP).

The UDI Platform by p36...

- supports consolidation and governance** of UDI-related product master data.
- provides the **end-to-end exchange capability** of UDI data with different regulatory authorities on one platform.
- enables **reusing existing data** and mapping to controlled vocabularies.
- offers **process automation** to implement compliance requirements faster and more reliably.
- is based on a solid foundation that can be **flexibly extended according to individual needs** and required regulations.

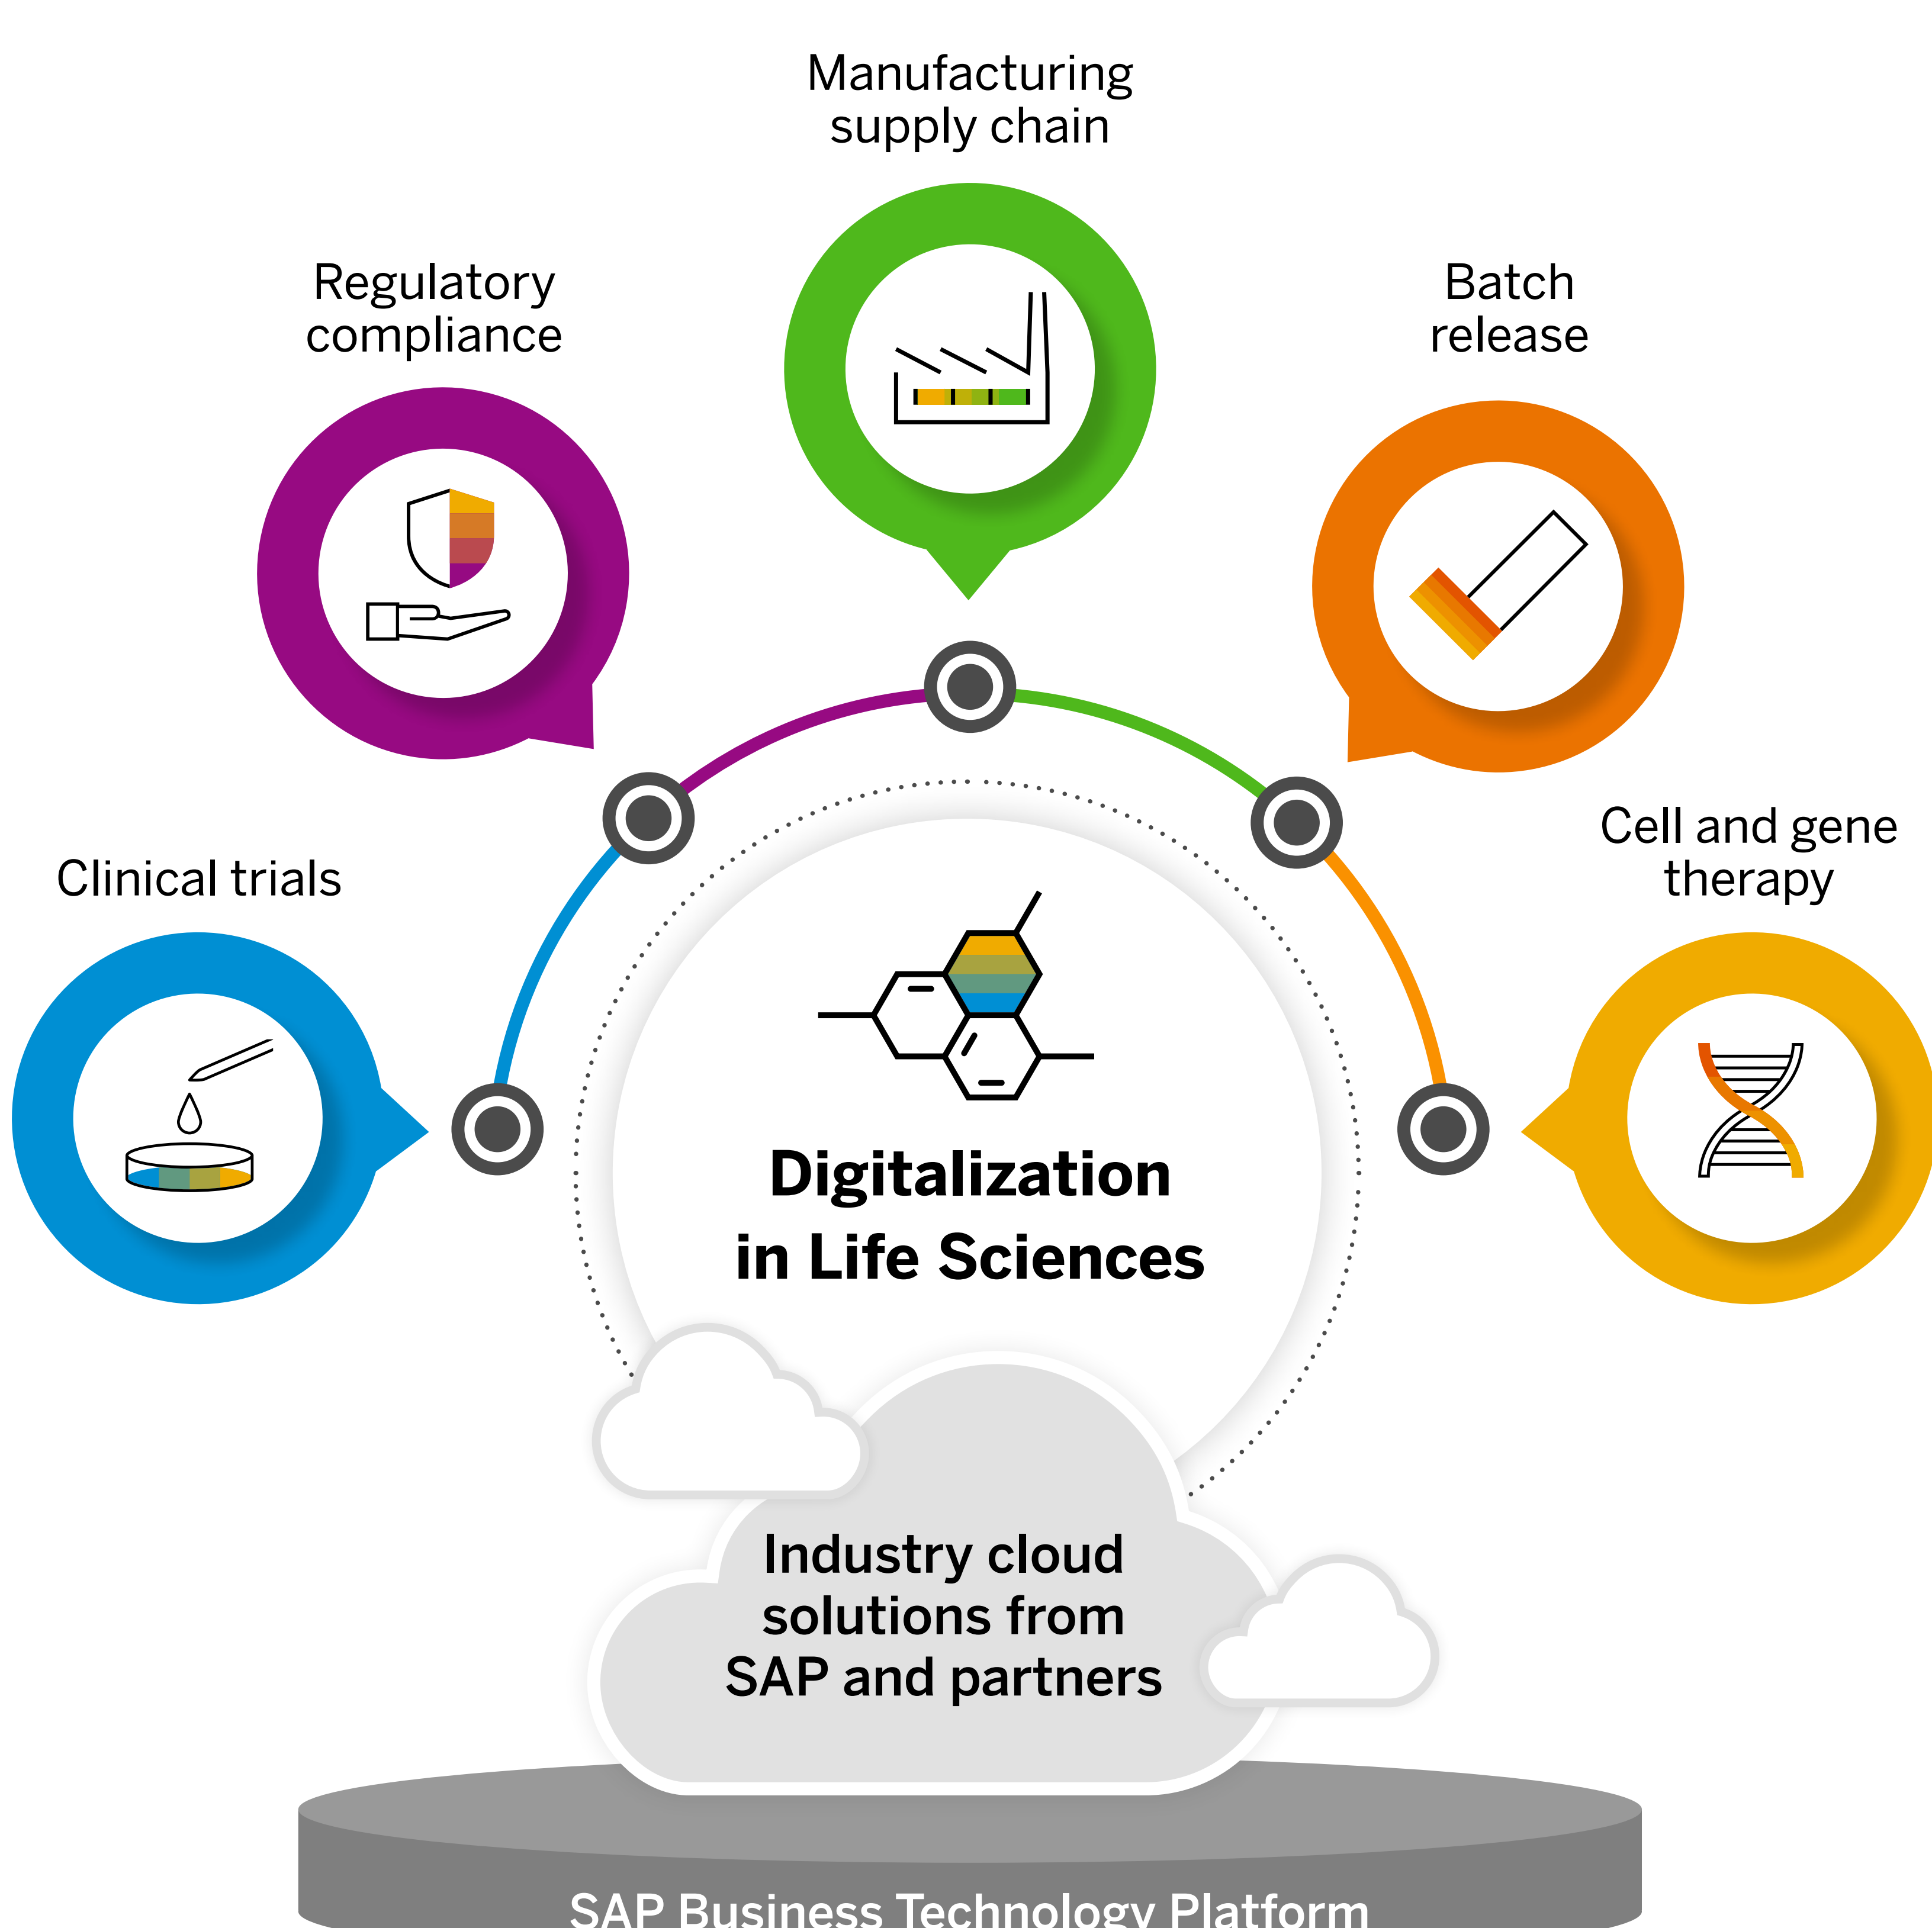

Benefits for Life Sciences Companies using the UDI Platform by p36

Managed Service by active market monitoring	Global & Scalable UDI compliance concept for upcoming regulations	Process Automation for faster time to compliance
Validation of Data based on official validation requirements of regulatory authorities	One Platform for end-to-end UDI data governance and data exchange with regulatory authorities	Native Integration into IT landscapes (SAP and Non-SAP)

Expanding the Life Sciences Business Network through SAP Partner-Enabled Applications

SAP Industry Cloud Applications for Life Sciences

SAP's industry cloud is the way for **our partners** and **SAP** to deliver solutions for customers that unlock new levels of efficiency, extend business processes at the edge, and enable innovative business models.

Is your **life sciences** company looking to take this industry best practice to the next level and achieve compliance for your medical devices?
